 - 2.4 The objects of professional activity
 - 2.5 Types of professional activity
 - 2.6 Functions of professional activity
 - 2.7 Typical tasks of professional activity
 - 2.8 Content of professional activity
3. The purpose of the educational program
 - 3.1 The general purpose of the educational program
 - 3.2 The purpose of the cycle of basic disciplines
 - 3.3 The purpose of the cycle of major disciplines
 - 3.4 The purpose of research work
 - 3.5 The purpose of the final assessment
4. Graduate's key competences
5. The main learning outcomes
6. Matrix for correlating learning outcomes for the educational program as a whole with the competency form
7. Competency map
8. Content of the educational program
 - 8.1 Educational program map.
 - 8.2 Summary table on the volume of the educational program

1. The passport of educational program

1.1 General information on educational program

1. Area of formation: Art and the humanities
2. A direction of preparation: the Humanities
3. Timeframe of training: 3 years
4. Language of training: Kazakh, Russian

5. Application to the State license to engage in educational activities the educational activities carried out under the license of the Ministry of education and science of the Republic of Kazakhstan No. 168 dated 03.02.2010 year, series АБ № 0137349 and re-arranged the order in accordance with the Decree of the Government of the Republic of Kazakhstan from April 28, 2012 year no. 544 on the reorganization of function by converting the date of issuance of the 15.10.2012 year, KKSON MES of RK № 1373 for educational program 6D020300- History

6. Accreditation of the educational program: Certificate of the Ministry of Education and Science of the Republic of Kazakhstan dated June 27, 2012 No. MON-001. Agency IQAA from 12/27/2014 - 12.26.2019
Registration number: SA №0039 / 6

7. The requirements for : Master of Arts in Humanities in the specialty “6M020300-History”, Master of Pedagogical Sciences in the specialty “6M011400-History”, Master of Humanities in the specialty “6M020800-Archeology and Ethnology”

8. Type of educational program: - operating

9. The installable prerequisites for mastering the program:

- In case of coincidence of the profile of the educational program of doctoral studies with the program of postgraduate education - is not required
- In case of non-coincidence of the profile of the educational program of doctoral studies with the program of postgraduate education:

10. Information about foreign partners in the implementation of the program:

- University of Naples (Italy, Naples)
- Moscow state University. M. V. Lomonosova (Russian Federation, Moscow)
- Altai state University (Russian Federation, Barnaul)
- Charles University (Czech Republic, Prague)
- International centre for education and scientific information (Germany, Dusseldorf)

12. The main base practices in the educational program:

- Pedagogical - Department of Archeology, Ethnology and National History
- Research - Department of Archeology, Ethnology and National History

13. Major scientific organizations, organizations of relevant industries or fields of activity, including foreign ones, for conducting scientific internships

- Moscow State University named after M Lomonosov, Russian Federation
- St. Petersburg State University, Russian Federation
- Charles University, Czech Republic
- Naples Orientalist University, Italy
- Siberian University of Consumer Cooperatives, Russian Federation

14. The main scientific organizations, research institutes, centers for scientific research

- State archive of the Karaganda region

- Central State Archive, Almaty
- Center for Ethno-Cultural and Historical-Anthropological Studies, Faculty of History, KSU named after E.A. Buketova
- Library N.V. Gogol, Karaganda
- National Library of the Republic of Kazakhstan, Almaty
- National Academic Library of the Republic of Kazakhstan

15. Opportunities for further continuation of education - postdoctoral programs

16. List of employers

2. The qualifying characteristic of PhD students

2.1 The list of qualifications and positions

A graduate of doctoral studies is awarded the degree of “PhD in the EP 8D 02205301- History”.

2.2 The sphere of professional activity

The sphere of professional activity of graduates on the educational program "8D02205301-History" are

-to achieve high quality postgraduate education, increase of work effectiveness of higher education institutions and research organizations, the development of scientifically sound practical recommendations on the activities of the various bodies of State power and administration and other organizations of the Republic of Kazakhstan.

2.3 The objects of professional activity of PhD students on educational program "8D02205301-Hisory" is

- The public administrations

- **The educational institutions, organs of Foreign Affairs**
- **The commercial and non-profit enterprises regardless of their form of ownership and departmental subordination**

2.4 The subjects of professional activity

The subject of professional activity of graduates in the educational program "8D02205301 - History" is History in the system of social sciences and humanities, teaching and research activities in higher education.

2.5 Types of professional activity:

Graduates of the EP "8D02205301 - History" can perform the following types of professional activity:

- The educational;
- The scientific research;
- The organizational and methodical;
- The work in government

2.5 The function of professional activity:

The functions of the professional activity of graduates of the EP "8D02205301 - History" are:

- The educational and methodical;
- The research;
- The educational;
- The organizational and methodical; involves fundamental educational, methodological and research training and in-depth study of disciplines in relevant areas of science for the social sectors.

2.6 Typical tasks of professional activity

Typical tasks of professional activity of graduates of the EP "8D02205301 - History" are:

- Achieving a high level of quality education through the presentation of mandatory requirements for the level of preparation of students in doctoral studies;
- The improvement of Kazakhstan's historical science and bringing the education system in compliance with international standards;
- The stimulation of independent educational and research and pedagogical activities of doctoral students;
- The training highly qualified scientific and pedagogical staff for universities of the Republic of Kazakhstan;
- The improvement of educational activities in the university and the formation of an active civic position of undergraduates;
- The use of active and innovative teaching methods in the modernization of public consciousness;
- The implementation of the programs "Mangilik el", "Ruhani zangyru", "Seven Facets of the Great Steppe";
- Evaluation of independent research activities of undergraduates, taking into account the criteria-based assessment;
- The increasing the publication activity of undergraduates in foreign and domestic scientific journals;
- Attracting undergraduates to participate fundamental research on current scientific problems of world and national history.

2.7 The content of professional activity

A PhD should have an idea about:

- On the main stages of development and the change of paradigms in the evolution of science;
- About subject, world outlook and methodological specificity of natural (social, humanitarian, economic) sciences;
- About scientific schools of the corresponding branch of knowledge, their theoretical and practical developments;
- On scientific concepts of world and Kazakhstan science in the relevant field;
- On the mechanism of implementation of scientific research in practical activities;
- The norms of interaction in the scientific community;
- On the pedagogical and scientific ethics of a research scientist. **Содержание пЛОфессиональной деятельности**

To know and understand:

- The current trends, trends and patterns of development of domestic science in the context of globalization and internationalization;
- The methodology of scientific knowledge;
- The achievements of world and Kazakhstan science in the relevant field;
- (to recognize and accept) the social responsibility of science and education;
- Perfectly foreign language for scientific communication and international cooperation;

To be able to:

- To organize, plan and implement the research process;
- To analyze, evaluate and compare various theoretical concepts in the field of research and draw conclusions;
- To analyze and process information from various sources;
- To conduct an independent scientific study, characterized by academic integrity, based on modern theories and methods of analysis;
- To generate their own new scientific ideas, communicate their knowledge and ideas to the scientific community, expanding the boundaries of scientific knowledge;
- To choose and effectively use modern research methodology;
- To plan and forecast their further professional development.

Skills:

- Critical analysis, evaluation and comparison of various scientific theories and ideas;
- The analytical and experimental research activities;
- The planning and forecasting research results;
- The oratory and public speaking at international scientific forums, conferences and seminars;
- The scientific writing and scientific communication;
- The planning, coordinating and implementing research processes;
- The system understanding of the field of study and demonstrate the quality and effectiveness of selected scientific methods;
- The participation in scientific events, fundamental scientific domestic and international projects;
- Leadership and team management;
- The responsible and creative attitude to scientific and scientific-pedagogical activity;
- The conducting a patent search and experience in transferring scientific information using modern information and innovative technologies; защиты
- The intellectual property rights to scientific discoveries and developments;

- Free communication in a foreign language.

To be competent:

- in the field of scientific and educational activities in the context of rapid updating and growth of information flows;
- in conducting theoretical and experimental research;
- in the formulation and solution of theoretical and applied problems in scientific research;
- in conducting professional and comprehensive analysis of problems in the relevant field;
- in matters of interpersonal communication and human resource management;
- in matters of university training specialists;
- in the examination of scientific projects and research;
- in ensuring continuous of professional growth.

3. The purpose of the educational program

3.1 The general purpose of the educational program:

-Preparation of highly qualified specialists for the development of the economy, industry and culture of the Republic of Kazakhstan, providing conditions for receiving full-time education, professional competence in the field of Humanities. The aim of the educational program the EP of "8D02205301-History" is the achievement of high quality postgraduate education subject to the mandatory requirements for training doctoral students; improving the effectiveness of higher education institutions and research organisations preparing PhD on a EP «8D02205301-History "; the ordering of the rights and responsibilities of students in PhD studies, encouraging independent study, research and professional activities of doctoral candidates; recognition of documents of the Republic of Kazakhstan concerning the attribution of academic degree "doctor of philosophy" in the international educational space and in the labour market.

3.2 The purpose of the cycle of basic disciplines

- is to acquire theoretical knowledge in the field of social sciences and humanities, to develop the creative potential necessary for the improvement of professional competencies.Цель цикла базовых дисциплин

3.3 Purpose of the cycle of the main disciplines

- is the practical training of graduates of the EP "8D02205301- History", possessing fundamental scientific and professional training, owning modern information technologies, able to organize and conduct research and experimental research in the chosen direction, able to successfully compete in the labor market.

3.4 The objective of research / experimental research

- The publication of scientific articles in collections of the near and far abroad;
- The publication of the results of scientific activities in international high-ranking scientific journals⁴
- Writing a doctoral dissertation

3.5 The purpose of the final certification

- assessment of the scientific-theoretical and research-analytical level of the doctoral candidate, formed professional and managerial competencies, readiness for independent performance of professional tasks and the compliance of his training with the requirements of the professional standard and educational program of PhD studies.

4. Graduate's key competences

The code of competence	The description of competence
Personal competencies	
PC 1 The propensity to research and personal development	Independence in conducting research, based on the task, the development of critical thinking abilities, creative solutions to complex, actual problems and the prediction of historical reality. Inclusion of elements of methodological, above-subject, logical activity, ways of organizing goal-setting, planning, analysis, reflection.
PC 2 The effective professional activity	The development of teaching skills in terms of updated content, the use of innovative technologies, work with various types of archival sources and the creation of museum compositions. Career management (understanding of the need to be responsible for their professional development, Abilities to set realistic and achievable goals, transfer Abilities of research skills to other work environments, Abilities to see a wide range of opportunities inside and outside the organization, Abilities to present their skills, abilities, opportunities and work experience .
PC3 The active life position, social responsibility	The work of student groups, the public, the implementation of a variety of organizers and team leaders. Awareness of the moral meaning of freedom, the development of legal consciousness, the adoption of civic values, as well as personal self-improvement necessary for the development of methods of intellectual and spiritual self-development.
Profile competencies	
PC 1 The organizational and methodological competence	The Abilities to set goals and motivate, plan and design, implement projects, professionally improving
PC 2 The communicative competence	The Abilities to establish subject-subject relations, the Abilities to observe ethics and etiquette in communication, to be able to analyze external signals, assertiveness, the Abilities to organize and conduct business negotiations and meetings, empathy, the Abilities to penetrate the interests of another person, mastering the skills of active listening, mastering oratory.
PC 3 The information competence	Application of the informational basis of professional activity using the Internet and IT technologies. The Abilities to independently search for, analyze, select, process and transmit the necessary information using oral and written communication technologies.
PC 4 The research competence	The Abilities to self-select research methods. The Abilities to interpret, critically evaluate and use in research work the achievements of both historical and humanitarian schools and directions in general. Generating the results of scientific research in the system of scientific knowledge

5. The main learning outcomes

Learning outcomes characterize the learner's abilities and are reflected through descriptors.

The code of results training	The results
<i>LO1</i>	To demonstrate a systematic understanding of the field of study, mastering the skills and research methods used in this field;
<i>LO2</i>	To demonstrate the Abilities to think, design, implement and adapt the essential research process with a scientific approach;
<i>LO 3</i>	To contribute to their own original research to expand the frontiers of science that deserved publication at national or international level;
<i>LO 4</i>	Critically analyze, evaluate and synthesize new and complex ideas;
<i>LO 5</i>	To communicate their knowledge and achievements to colleagues, the scientific community and the general public;
<i>LO 6</i>	To promote the advancement in the academic and professional context of the technological, social or cultural development of a society based on knowledge.
<i>LO 7</i>	To demonstrate the theoretical basis for the study of the latest theories in the field of historical science and other humanities; considers modern schools and trends in the system of humanitarian knowledge in the light of an interdisciplinary approach in the studied issues
<i>LO 8</i>	To possess knowledge in the field of theory and methodology of historical research, as well as knowledge in the field of historical demography of Kazakhstan
<i>LO 9</i>	To evaluate the level of their professional training during practical activities
<i>LO 10</i>	To demonstrate knowledge in the field of key problems of national history and historiography, develops the methodology of scientific research
<i>LO 11</i>	To show own skills of scientific research, obtained as a result of training, uses research experience to write sections of a doctoral dissertation
<i>LO 12</i>	Freely navigate the latest theories and concepts of the modern humanities, uses interdisciplinary approach in historical research, formulates the basic provisions of doctoral thesis
<i>LO 13</i>	To carry out scientific research accordance with the guidelines for writing and processing a doctoral dissertation, has a knowledge of ideological nature

6. Matrix for correlating learning outcomes for the educational program as a whole with the competency form

	LO 1	LO 2	LO 3	LO 4	LO 5	LO 6	LO 7	LO8	LO 9	LO 10	LO 11	LO 12	LO 13
