- leadership of scientific, pedagogical and administrative team in government bodies and institutions;
- planning and organization of educational work in the sphere of education.

## 17. Formulation of learning outcomes based on competencies

Type of competence	The learning outcome code	The result of training (by taxonomy of Bloom)
1. Behavioral skills and personal qualities: (Softskills)	LO 1	Demonstrates knowledge of the methods of critical analysis and assessment of modern scientific achievements, as well as methods for generating new ideas in solving research and practical problems, including in interdisciplinary areas
	LO 2	Demonstrates knowledge of the content of the process, the purpose of which is professional and personal development, its features and methods of implementation in solving professional tasks, based on the stages of career growth and labor market requirements
	LO 3	Demonstrates knowledge of the current state of science, directions, problems, theories and methods of research activity of the subject area
	LO 4	Owens the skills to apply the knowledge of the fundamental principles of legal science to solve research problems in the sub-ject area
	LO 5	Demonstrates knowledge of private-scientific research methods, such as: legal qualification, comparative analysis method for research
2. Professional competencies: (Hardskills)	LO 6	Knows how to choose and apply experimental and theoretical methods of research in professional activities; interpret and correctly evaluate the data
	LO 7	Owens general research methods: analysis, synthesis, dialectical method, historical method, structural-functional method, sociological method, static method
	LO 8	Critically interprets the significance of the achievements of legal science and scientific research for the purpose of self-improvement and professional development
	LO 9	Defines the problem of research, applies the latest achievements of legal science in professional activities
	LO 10	Able to search, including the use of information systems and databases, and perform critical analysis of information on the subject of the research
	LO 11	Demonstrates knowledge of all types of scientific and technical documentation, including scientific reports, reviews, contributions and articles
	LO 12	Proficient in analyzing scientific texts; various methods, technologies and types of communication in the implementation of professional activities in the state and foreign languages
	LO 13	To characterize directions of criminal policy on combating crime in accordance with program documents of the Republic of Kazakhstan; Analysis of the effectiveness of the implementation of priority areas for the improvement of criminal legislation and measures to combat crimes
	LO 14	Analyzes, creates, refers and reviews academic texts using communicative strategies and tactics

**18. Determination of modules of disciplines in accordance with the results of training**

<b>The learning outcome code</b>	<b>Module name</b>	<b>Name of disciplines</b>	<b>Volume (ECTS)</b>
LO 13	Methodological basics of research	Academic writing	5
LO 1, LO 4		Methods of scientific research	5
LO 5, LO 10	The main trends in improving the legal system of the Republic of Kazakhstan	Issues of constitutional legislation reform	5
PO 7, LO 11		Teaching practice	10
LO 5		Research practice	10
LO 3, LO 9	Modern problems of state and law	Cratology: the science of power	5
LO 14, LO 2		Problems of ensuring the cultural rights of man and citizen in the Republic of Kazakhstan and the modern world	5
LO 8, LO 12		Issues of reforming the activities of executive bodies at the present stage	
LO 6, LO 11		Problems of the implementation of criminal policy	
LO 7		Development of doctrine of civil law in Republic of Kazakhstan	
LO 7, LO 13	Research work by a doctoral candidate	Research work of a doctoral candidate, including the internships and doctoral thesis	123
	Final certification	Writing and defending a doctoral dissertation	12

19. Matrix achievability of learning outcomes

NN	Name of disciplines	Brief description of discipline	Amount of credits	Formed results (codes)													
				LO 1	LO 2	LO 3	LO 4	LO 5	LO 6	LO 7	LO 8	LO 9	LO 10	LO 11	LO 12	LO 13	LO 14
Cycle of basic disciplines University components																	
D1	Academic writing	The discipline is studied in order to form competencies related to analytical research and textual activities; skills of analytical-synthetic, critical and pragmatic thinking. In the process of studying the discipline, the types, methods and ethical principles of writing scientific texts, the principles of constructing a scientific text and preparing it for publication, the design of a bibliographic list, the basic rules for quoting scientific literature, the types of annotations and the features of their compilation, reviewing a scientific text are considered.	5														+
D2	Methods of scientific research	The discipline is studied in order to form the skills of doctoral students to carry out independent research activities; the use of scientific research methods to achieve the objectives set in the dissertation research; the use of methods of processing empirical data on the topic of their dissertation research.	5	+			+										

D3	Teaching practice	The purpose of pedagogical practice is the formation of doctoral students professional competencies that ensure readiness for pedagogical activity in universities, designing the educational process in accordance with the profile of training and conducting certain types of training sessions using innovative educational technologies.	10						+								
Cycle of basic disciplines Component for choosing																	
D4	Cratology: the science of power	Mastering by the doctoral students of a system of knowledge about the government itself, primarily about state power, and its many other and varied types, spheres and manifestations. The development of skills and the ability to evaluate them, the formation of the ability to turn acquired knowledge into beliefs and a driving force of behavior for the professional fulfillment of his duties in the future as a scientific researcher of a lawyer and lawyer	5						+								+
	Problems of ensuring cultural human rights and citizen in the Republic of Kazakhstan and the modern world	Constitutional and legal nature of cultural rights of man and citizen in Kazakhstan and modern society. Genesis and system of cultural rights and human freedoms. International legal standards and consolidation of cultural rights and human freedoms in foreign countries. Mechanism for the implementation and protection of cultural rights.										+					
Cycle of profiling disciplines University components																	

D5	Issues of constitutional legislation reform	It is to formulate, substantiate and develop new approaches in identifying topical issues of the constitutional development of the Republic of Kazakhstan, the stages of the constitutional development of the Republic of Kazakhstan, in accordance with the new concept of legal thinking and constitutionalism.	5			+						+					
D6	Research practice	The purpose of the research practice is the study by doctoral students of the latest theoretical, methodological and technological achievements of national and international science, as well as the consolidation of practical skills in applying modern methods of scientific research, processing and interpretation of experimental data in a dissertation research.	10						+								
Cycle of profiling disciplines Component for choosing																	
D7	Issues of reforming the activities of executive bodies at the present stage	To form skills among doctoral students, such as formulate and analyze problems associated with the formation and development of constitutional and legal regulation of the executive branch in Kazakhstan and foreign countries; the ability to develop decisions that take into account the legal regulatory framework; own basic concepts in the field of executive power in the system of separation of powers; receptions of public discussion on executive power in the system of separation of powers; independent work sk.	5			+											+

**20. Coordination of planned learning outcomes with methods of training and evaluation within the module**

<b>Learning outcomes</b>	<b>Planned learning outcomes on module</b>	<b>Teaching methods</b>	<b>Assessment methods</b>
LO 1	Demonstrates knowledge of the methods of critical analysis and evaluation of modern scientific achievements, as well as methods for generating new ideas in solving research and practical problems, including in interdisciplinary areas	panel discussion Interactive lecture	Writing an essay presentation
LO 2	Demonstrates knowledge of the content of the process of aiming professional and personal development, its features and methods of implementation in solving professional problems, based on the stages of career growth and labor market re-quirements	discussion Interactive lecture	Writing an essay presentation
LO 3	Demonstrates knowledge of the current state of science, areas, problems, theories and methods of research activities of the subject area	panel discussion discussion	Writing an essay
LO 4	Owens the skills to apply the knowledge of the fundamental principles of legal science to solve research problems in the sub-ject area	Interactive lecture	presentation
LO 5	Demonstrates knowledge of private-scientific research methods, such as: legal qualification, comparative analysis method for research	panel discussion discussion	presentation Practice report
LO 6	Knows how to choose and apply experimental and theoretical methods of research in professional activities; interpret and correctly evaluate the data	panel discussion discussion	presentation Practice report Writing of doctoral dissertation
LO 7	Owens general research methods: analysis, synthesis, dialectical method, historical method, structural-functional method, so-ciological method, statistical method	Interactive lecture discussion	Writing an essay Writing a scientific article
LO 8	Critically interprets the significance of the achievements of legal science and scientific research for the purpose of self-improvement and professional development	panel discussion	test

LO 9	Defines the problem of research, applies the latest achievements of legal science in professional activities	panel discussion	presentation
LO 10	Able to search, including the use of information systems and databases, and perform critical analysis of information on the subject of the research	discussion panel discussion	Writing of doctoral dissertation presentation
LO 11	Demonstrates knowledge of all types of scientific and technical documentation, including scientific reports, reviews, reports and articles	Interactive lecture	presentation
LO 12	Proficient in analyzing scientific texts; various methods, technologies and types of communication in the implementation of professional activities in the state and foreign languages	discussion	colloquium
LO 13	To characterize directions of criminal policy on combating crime in accordance with program documents of the Republic of Kazakhstan; Analysis of the effectiveness of the implementation of priority areas for the improvement of criminal legislation and measures to combat crimes	discussion	Writing a scientific article
LO 14	Analysis, creation, reviewing of academic texts using communicative strategies and tactics	Analysis and structuring of texts Reflection of hypothesis	Abstract and reference paper Writing an essay

## 21. Criteria for assessing the achievability of learning outcomes

Codes of LO	Criteria
LO 1	<b>Knows:</b> methods of critical analysis and evaluation of modern scientific achievements. <b>Can:</b> to use methods of generating new ideas in solving research and practical problems, including in interdisciplinary fields.
LO 2	<b>Knows:</b> the content of the process, the purpose of which is professional and personal development, its features and methods of implementation in solving professional tasks, based on the stages of career growth and the requirements of the labor market.
LO 3	<b>Knows:</b> the current state of science, directions, problems, theories and methods of research activity of the subject area of knowledge of methods of interpretation and types of systematization of normative legal acts.
LO 4	<b>Owns:</b> skills of applying knowledge of the fundamental principles of legal science to solve research problems in the subject area.
LO 5	<b>Knows:</b> private scientific research methods: legal qualification, comparative analysis method for conducting scientific research.
LO 6	<b>Can:</b> to choose and apply experimental and computational-theoretical research methods in professional activity; to interpret and competently evaluate the data obtained.
LO 7	<b>Owns:</b> general methods are excised by: analysis, synthesis, dialectical method, historical method, structural-functional method, sociological method, statistical method.
LO 8	<b>Can:</b> critically comprehend the significance of the achievements of legal science and scientific research.
LO 9	<b>Knows:</b> methodology of teaching legal disciplines in higher education, problems in the framework of dissertation research. <b>Can:</b> apply modern achievements of legal science in professional activity.
LO 10	<b>Can:</b> to search, including using information systems and databases, and to perform a critical analysis of information on the subject of ongoing research.
LO 11	<b>Knows:</b> all types of scientific and technical documentation, including scientific reports, reviews, reports and articles.
LO 12	<b>Owns:</b> skills of analyzing scientific texts; various methods, technologies and types of communication in the implementation of professional activities in the state, Russian and foreign languages.
LO 13	<b>Can:</b> to characterize the directions of criminal policy to combat crime in accordance with the program documents of the Republic of Kazakhstan; to analyze the effectiveness of the implementation of priority areas for improving criminal legislation and measures to combat crimes.
LO 14	<b>Can:</b> analyze, create, refer and review academic texts using communication strategies and tactics.

## 22. Graduate model

Attributes of a graduate of doctoral studies:

- Deep professional knowledge in their sphere of training;
- Interest in the development of trends in the sphere of education and science;
- Ability to collaborate in the professional community;
- Independence in the search for the possibilities of professional and personal development;
- Sociability;
- Tolerance and educatedness;
- Academic honesty;
- Willingness to participate in the decision of state tasks and strategies of Kazakhstan.

### Educational program graduate model

Types of competences	Description of competences
1 Behavioral skills and person-al qualities: (Softskills)	<ul style="list-style-type: none"> <li>- demonstrates knowledge of the methods of critical analysis and assessment of modern scientific achievements, as well as methods for generating new ideas in solving research and practical problems, including in interdisciplinary areas;</li> <li>- demonstrates knowledge of the content of the process, the purpose of which is professional and personal development, its features and methods of implementation in solving professional problems, based on the stages of career growth and the requirements of the labor market;</li> <li>- demonstrates knowledge of the current state of science, directions, problems, theories and methods of research activity of the subject area;</li> <li>- owns the skills of applying knowledge of fundamental principles of legal science to solve research problems in the subject area;</li> <li>- demonstrates knowledge of private scientific research methods, such as: legal qualification, a method of comparative analyzes for conducting scientific research.</li> </ul>
2. Professional competencies (Hardskills)	<ul style="list-style-type: none"> <li>- able to choose and apply experimental and currently theoretical research methods in professional activities; interpret and competently evaluate the obtained data;</li> <li>- owns general research methods: analysis, synthesis, dialectical method, historical method, structural and functional method, sociological method, statistic method;</li> <li>- critically comprehends the importance of achievements of legal science and scientific research for self-cultivation and professional development;</li> <li>- determines the problem of research, applies modern achievements of legal science in professional activities;</li> <li>- knows how to search, including using information systems and databases, and perform a critical</li> </ul>

	<p>analysis of information on the subject of conducted research;</p> <ul style="list-style-type: none"> <li>- demonstrates knowledge of all types of scientific and technical documentation, including scientific reports, reviews, reports and articles;</li> <li>- owns the skills of analyzing scientific texts; various methods, technologies and types of communication in the implementation of professional activities in state and foreign languages;</li> <li>- analyzes, creates, reflective and reviews academic texts using communicative strategies and tactics;</li> <li>- characterizes the directions of criminal policies to combat crime in accordance with the program documents of the Republic of Kazakhstan; analysis of the effectiveness of the implementation of priority areas for improving criminal legislation and crime control measures.</li> </ul>
