- teaching doctoral students the methodology and methods of independent solution of scientific research problems,
- ensuring the formation of professional scientific research thinking,
- development of the creative abilities of future specialists,
- increasing the level of their professional training on the basis of an individual approach and strengthening of independent creative activity,
- ensuring readiness for professional self-improvement,
- development of innovative thinking.

3.5 Purpose of the final assessment

- assessment of the level of acquired knowledge, skills and abilities;
- assessment of the degree of mastering by the graduate of general cultural and professional competences;
- assessment of the degree of readiness of a doctoral student to solve professional problems in accordance with the profile direction of the EP of doctoral studies and types of professional activity;
- assessment of the degree of possession of the skills of independent research activities, requiring a broad education in the relevant professional field;
- making a decision to award the graduate with the degree "Doctor of Philosophy PhD" in the specialty 8D02306001-Philology and issue a diploma of the established sample.

4 The main competencies of the graduate

Competence code	Competence nature
Personal competencies	
TK1	TK1 Improves and develops the intellectual and general cultural level; uses the acquired knowledge in teaching philological disciplines.
TK2	TK2 Ability to use a foreign language fluently as a means of business communication and social mobility
TK3	TK3 Conscious use of in-depth knowledge of legal and ethical norms in the evaluation of the results of their

	professional activities, the development and implementation of socially significant projects.
TK4	TC4 Adaptation to the use of products in the process of teaching the knowledge, skills and abilities acquired in the future professional, public service in the basic and professional disciplines.
TK5	TC5 Formation of an active civic position in understanding the essence of public policy, its methods and tools, in determining the forms of citizen participation in public policy.
TK6	TC6 Understanding the need for continuous self-education, self-development, adaptation to new situations, re-evaluation of experience, analysis of their capabilities.
TK7	TC7 Approval of the norms of active and creative development of knowledge, skills and abilities formed in the education process, their application in future professional and social activities.
TK8	TC8 Striving for self-development, improving their scientific skills; expand and deepen their scientific worldview
TK9	TC9 Development and research of skills for independent discovery of scientific information through information technology, the use of new knowledge and skills in practice.
TK10	TC10 Ability to set professional goals and choose strategies to achieve them.
Professional competencies	
KK1	To be able to apply the skills of philosophical principles in solving pressing problems of modern life, to apply in professional activities the methods of designing and forecasting socio-political, socio-cultural processes in modern societies.
KK2	Be able to use the acquired knowledge for the preparation of theoretical and practical guidelines in the field of professional scientific and pedagogical methodology, methods of organization of research and educational work; be able to use the knowledge acquired in the teaching of philological disciplines.
KK3	Conducting research, writing a dissertation and the use of linguistic knowledge and professional foreign vocabulary in practice.
KK4	Be able to independently formulate the goals, objectives, tools and methods of implementing research programs; use of conditions for obtaining grants for the commercialization of the results of scientific and scientific and technical activities for the conduct and commercialization of knowledge of intellectual property rights of participants in scientific and scientific and technical activities, scientific and applied research.
KK5	Free use of modern methods of processing and interpretation of complex information to solve scientific and practical problems, including those directly outside the field of activity (according to the direction of the master's program)
KK6	Successful solution of goals and objectives of research on the basis of theoretical knowledge, skills and practical experience acquired during the study of the discipline.
KK7	On the basis of the acquired knowledge and skills to be aware of the complex processes of modern education, to adapt to them, to apply the acquired theoretical knowledge and skills in professional activities.
KK8	Mastery of all types of speech to solve communication problems, such as the behavior of a foreign language speaker, taking into account the national and cultural features of everyday life, language phenomena.
KK9	Qualified application of theoretical knowledge in scientific and creative practice, the formation of a high level of professionalism, the search for the development of their professional skills and the development of

	the education system.
KK10	Internship in education in world languages, including Russian and Kazakh. Improving public speaking skills, the formation of oral and written culture. Skills and methodological skills to increase mobility in public relations.
KK11	Individuals with national symbols that characterize the national mentality and spirituality of each nation, the definition of the main features of the culture of the nation, the peculiarities of national ethnicity in the description of the environment through language in connection with such sciences as literature, culture, philosophy, anthropology, psychology, cognitive theory. To be aware of research and use it in scientific work.
KK12	Improving the skills of research, essay writing and analysis in the disciplines taught.
KK13	Acquisition and organization of digital, textual, graphic and visual information using information and communication technologies for the planning and organization of future activities, the availability of a website, network and multimedia technologies, the organization of online forums and seminars; use their own information retrieval methods on the Internet and in databases.
KK14	Knowledge of ethical, spiritual, cultural values, forms of regulation of social behavior and basic laws, concepts of social attitudes to the person, knowledge of the culture and traditions of the peoples of Kazakhstan, trends in society, ability to orient different social situations, creative thinking, culture, customs to be patient with the traditions, to take an active position in life.
KK15	Knowledge of the types, objectives and areas of professional activity, the development of teaching and education strategies that allow to achieve education outcomes, the creation of conditions for the development of creative potential, new ideas and innovations, education in basic disciplines of teaching and education.
KK16	Gain the skills to effectively consolidate theoretical material during training and internship, to be able to work effectively individually and as a team member, as well as to form the competitiveness of graduates in the labor market in the field of education, providing opportunities for quick employment in the specialty, initiative.
KK17	Development of the ability to independently set specific tasks of research in the field of philological science (according to the program profile) and solve them with the help of modern information technology, the use of new domestic and foreign experience.
KK18	Ability to professionally create scientific and technical documentation and research work, scientific reports, reviews, reports, articles (according to the program profile)
KK19	Formulation and defense of the results of dissertation research on the basis of the use of optimal methodology and techniques of scientific research; to adapt to the application of knowledge, skills and abilities acquired in the educational process in professional activities.

5 The main education outcomes

Education Outcome	Code Education Outcomes
<i>OH1</i>	Acquisition of permanent knowledge and skills in the field of philological science and their application in the conduct of dissertation research
<i>OH2</i>	Apply their knowledge, understanding and skills at a professional level to solve problems in the field of education and practical professional activity
<i>OH3</i>	Collection of information and its processing to form the research concept of the dissertation
<i>OH4</i>	Acquisition of a set of knowledge, skills and abilities necessary for further independent study in the field of philological science
<i>OH5</i>	To be able to deepen the general and special methods of modern philological science, to master the skills of using the methodology of philological science
<i>OH6</i>	Interaction with the professional community and all stakeholders in education, the ability to initiate innovative ideas that unite educational stackers, to conduct linguistic analysis in the Kazakh-Russian-English language in law enforcement agencies
<i>OH7</i>	Be able to conduct scientific discussions on topical issues of modern philological science
<i>OH8</i>	Facilitate the development of native language, Russian and English, knowledge and communication strategies in the field of communication technology, dialogue skills, communication in a multicultural, polyethnic and multi-religious society for the development of developed and literate languages
<i>OH9</i>	Knowledge of legislative documents in the context of updated educational content; Improving basic knowledge in the formation of an individual who can think critically
<i>OH10</i>	Ability to effectively use innovative technologies, methods of teaching the Kazakh language in a foreign language audience, to critically evaluate, to draw their own conclusions
<i>OH11</i>	Mastering a foreign language as a means of professional communication, as a means of improving their professional and personal level
<i>OH12</i>	Implementation of teaching activities using modern innovative educational technologies, implementation of curricula for teaching philological and special language disciplines for different audiences
<i>OH13</i>	Ability to work effectively in teams, defend their position, express confidence, find compromise and alternative solutions
<i>OH14</i>	Ability to work analytically, to carry out research and innovation activities in order to acquire new knowledge and to be able to use this knowledge for expert assessment of specific management situations
<i>OH15</i>	Have the skills of independent creativity, research work, the ability to effectively and efficiently organize their activities, an understanding of the possibilities of commercialization of the results of their research work
<i>OH16</i>	To be focused on the effective use of knowledge, skills and abilities in the future professional and social activities, the knowledge acquired in the education process, self-continuous education and self-development; formation of active citizenship and Kazakhstani patriotism
