Definition of modules of disciplines in accordance with learning outcomes

Result code learning	Module name	Name of disciplines	Volume (ECTS)
ON1, ON11	Philosophical and historical aspects of social and humanitarian kONwledge	History and philosophy of science	4
ON1, ON11		Pedagogy of higher education	4
ON1, ON2		Psychology of management	4
ON1, ON2, ON3		Teaching practice	4
ON3, ON5	Professional languages	Foreign language (professional)	4
ON3, ON4		Professional foreign terminology in sociological science	4
ON2, ON3		Sociolinguistics	
ON2, ON9	Innovative aspects of basic training	Sociological research in education and science	5
ON11, ON12		Commercialization of the results of scientific and scientific and technical activities	
ON4, ON8		Application of modern approaches in applied sociological research	6
ON2, ON8		Field Research Methodology	
ON 8, ON 10	Technology of sociological research	Sociological theories	5
ON4, ON5		Sociology of the Internet	4
ON 10, ON11		The system of social partnership in the Republic of Kazakhstan	4
ON10, ON11, ON 12	Social institutions and processes	Processing and analysis of quantitative data	4
ON 8, ON9, ON11		Methods and technologies in the study of social problems of society	
ON 10, ON 11		Modeling and forecasting in sociological research	4
ON1, ON6, ON12		Sociology of electoral behavior	
ON4, ON5		Sociology of communication	4
ON 7, ON10, ON 11		Sociology of social networks	
ON 8, ON11		Design, methodology and research methods in the social sciences	4
ON 8, ON11		Methodology and technique of specific sociological research	
ON 7, ON 10		Modern stratification processes	4
ON 7, ON10		Sociology of social change	
ON3, ON10		Sociology of Globalization	4

ON7, ON10, ON12		Public policy and analysis	
ON 8, ON 9		Research practice	12
ON2, ON9	Research work	Research work of a master student, including an internship and a master's thesis	24
ON2, ON9	Final examination	Registration and defense of a master's thesis	12

Achievability Matrix of Learning Outcomes

NN п/п	Name disciplines	Brief description of the discipline	Quantity loads	Formed learning outcomes (codes)											
				ON 1	ON 2	ON 3	ON 4	ON 5	ON 6	ON 7	ON 8	ON 9	ON 10	ON 11	ON 12
Cycle of basic disciplines University component															
D1	History and philosophy of science	History and philosophy of science as the study of the general patterns of scientific kONwledge in its historical development and changing socio-cultural context. Philosophy of science and methodology of science. Features of scientific kONwledge. Historical development of institutional forms of scientific activity. Scientific communities and their historical types. Training of scientific personnel. Changing the place and role of science in the life of society	4	+										+	
D2	Pedagogy of higher education	Pedagogical science in the system of human sciences. Modern paradigm of higher education. Methodology of pedagogical science. Holistic pedagogical process of higher education. Theory of learning in higher education. Traditional and ONn-traditional methods and forms of organization of education in higher education. New educational techONlogies in higher education.	4	+										+	
D3	Psychology of management	Introduction to the psychology of management. Features of the psychology of management. Theoretical and methodological problems of modern management. Control functions. Organization structure. Motivation to work in management. Structure of communication. Management of personnel motivation. Conflicts and methods of their analysis.	4	+	+										
D5	Foreign language (professional)	Education science in the modern era. Science and production of the future. The system of secondary and higher education in Kazakhstan and abroad. Types of schools and universities. Professional training of the future teacher in Kazakhstan and abroad. Dialogue of cultures. University tradition in Kazakhstan and abroad.	4			+		+							

Cycle of basic disciplines Selectable Component														
D6	Professional foreign terminology in sociological science	Modeling language professional competencies using foreign terminology, foreign scientific terminology, speaking skills and conducting scientific discussions using foreign scientific terminology.	4			+	+							
	Sociolinguistics	Search for cause-and-effect relationships between language and the social conditions of its existence: language and nation, national languages as a historical category, social differentiation of language, relationships between linguistic and social structures, typology of linguistic situations determined by social factors, social aspects of multilingualism. Methods of sociolinguistics. The concept and types of language policy.			+		+							
D7	Sociological research in education and science	Essence, goals, objectives and normative process of sociological research in education and science. Empirical and theoretical research, their main directions. Logic and main stages of scientific research. Analysis of the research results and their scientific and practical significance.	5		+						+			
	Commercialization of the results of scientific and scientific and technical activities	The legal essence of the commercialization of the results of scientific and (or) scientific and technical activities in the Republic of Kazakhstan, the mechanisms for commercializing the results of scientific and (or) scientific and technical activities, the concept, legal regulation and protection of intellectual property, the choice of organizational and legal form and the legal conditions for creating a startup.											+	+
D8	Application of modern approaches in applied sociological research	Modern approaches, methods and techniques of applied sociological research, innovative skills for collecting, processing and analyzing empirical information, practical skills for studying and evaluating modern social processes, phenomena and events.	6		+						+			
	Field technique research	Basic rules for collecting primary information, operational data in the process of field research, organization procedures, stages, field control, processing of results. Basic procedures for field research. Planning and implementation of field research. Approaches and methods of ascending and descending strategies for the analysis of quantitative and qualitative sociological data.			+					+				

Cycle of major disciplines University component														
D9	Sociological theories	The course "Sociological Theories" examines the main sociological ideas and concepts of world sociologists on the subject of sociology, basic sociological concepts and research methodology. The material presented in the course is, first of all, examples of theoretical research in sociology and the modern sociological style of thinking in general.	5							+			+	
D10	Sociology of the Internet	The concept of the information society, theory, methods of applied analysis of social networks, features of virtual societies, groups, communications. Methodology and methods of online surveys. The sociology of the Internet involves the application of sociological theory and methods to the Internet as a source of information and communication	4				+	+						
D11	The system of social partnership in Republic of Kazakhstan	The essence and functions of social partnership, the history of the development of social partnership, its modern forms, labor relations, the role of trade unions in protecting the rights of employees, mediation and negotiations, corporate social responsibility, the legal framework for social partnership in the Republic of Kazakhstan.	4										+	+
Cycle of major disciplines Selectable Component														
D12	Processing and analysis of quantitative data	The course is aimed at studying the basic features and rules of statistical analysis, data processing and reporting using a statistical package for the social sciences. Methods for analyzing quantitative data are considered, in particular, methods of descriptive statistics, methods for studying the relationship between features, etc.	4										+	+
	Methods and technologies in the study of social problems of society	The course under study systematizes knowledge about qualitative and quantitative methods and technologies for the study of social issues, shows the possibilities and limitations of the use of quantitative and qualitative methods on the example of specific studies. The role of interpretive sociology as the leading paradigm of modern sociological knowledge is analyzed.									+	+		+
D13	Modeling and forecasting in sociological research	Model and predictive approaches to the analysis of social reality, modeling and forecasting of various social processes, phenomena, events, facts. Study of the history, theory and practice of social modeling and forecasting. Mastering the conceptual apparatus of this	4										+	+

		field of kONwledge in general and the termiONlogy of its specific sections and methods of analysis.													
	Sociology of electoral behavior	The study of problems related to the behavior of the population in election campaigns, the electoral orientations of social communities and individual citizens, the analysis of factors affecting participation in elections and voting, the motives for participation or ONn-participation in them, the study of the structure of the electorate, the peculiarities of their perception of election events, parties and personalities of candidates, evaluating the effectiveness of the media and the levels of their impact on the positions of voters, forecasting the results of elections.		+					+						+
D14	Sociology of communication	The course consists of three thematic sections: sociology of mass communication, sociology of mass media and sociology of mass media. Features of the functioning of mass media and their impact on a person and society.	4				+	+							
	Sociology of social networks	The course deals with a new direction in the analysis and structuring of sociological data - social networks. The history of the development of network approaches is considered; analyzes the structural elements of social networks, the concept of "structural holes"; indicators of network properties: strength of connections, network density, local and global centrality.							+			+	+		
D15	Design, methodology and research methods in the social sciences (in English)	The course provides kONwledge about design, methodology and research methods in the social sciences. Addresses the fundamental issues of research design, develops skills to both conduct and critically evaluate scientific research. Introduces various research methodologies in the social sciences.	4						+			+			
	Methodology and technique of specific sociological research (in English)	The course presents quantitative, qualitative and complex strategies for sociological research. The features and application in field research of such methods of sociological research as in-depth (unstructured) interviews, focus groups, visual research methods are considered. The ethical aspects of relationships with respondents and informants, etc. are considered.							+			+			
D16	Modern stratification processes	The course analyzes the essence and functions of social stratification, the history of social inequality and its modern forms, the theory of status groups, social mobility and reproduction, social stratification in traditional societies and the processes of stratification in modern Kazakhstani society.	4						+			+			
	Sociology of social	The training course "Sociology of Social Change" is a							+			+			

	change	consistent description of the processes of social processes in modern society in the context of classical, modern and post-modern concepts of social change. Particular attention is paid to the processes of economic, political, social and cultural modernization of modern societies.
