#### **EDUCATIONAL PROGRAM**

7M02303-Translation and SMART technologies in linguistics

Level: Master's

#### APPROVAL SHEET

### EDUCATIONAL PROGRAM «7M02303 – TRANSLATION AND SMART-TECHNOLOGIES IN LINGUISTICS»

#### Educational program in the field of training 7M02303 - Translation and SMART technologies in linguistics:

- Law of the Republic of Kazakhstan dated July 27, 2007 No. 319-III "On Education";
- Law of the Republic of Kazakhstan dated July 11, 1997 No. 151-I. "On languages in the Republic of Kazakhstan";
- State Compulsory Standard of postgraduate Education, approved by Order No. 2 of the Minister of Science and Higher Education of the Republic of Kazakhstan dated July 20, 2022;
- National Qualifications Framework of March 16, 2016 of the Republican Tripartite Commission on Social Partnership and Regulation of Social and Labor Relations;
- Rules for the organization of the educational process on credit technology of education in organizations of higher and (or) postgraduate education, approved by Order of the Minister of Science and Higher Education of the Republic of Kazakhstan dated April 4, 2023 No. 145;
- Classifier of training programs with higher and postgraduate education dated October 13, 2018, No.569;
- The professional standard "Translator", approved by the order of the Deputy Chairman of the Board of the National Chamber of Entrepreneurs of the Republic of Kazakhstan "Atameken" dated January 26, 2021 No. 14.
- Standard "Teacher" approved by Order of the Ministry of Education of the Republic of Kazakhstan No. 500 dated December 15, 2022
- Professional standard for teachers (teaching staff) of organizations of higher and (or) postgraduate education, approved by Order of the Minister of Science and Higher Education of the Republic of Kazakhstan No. 591 dated November 20, 2023.

c) Types of the graduate's professional activity are:	- translation (translation of texts and documents of different genres, interpretation of negotiations, international meetings, conferences);
	- organizational (organization and running various kinds of events, the creation of
	professional and public bodies and organizations);
	- production and management (management and performance of professional duties) in the
	appropriate offices of domestic, foreign and joint ventures, organizations and institutions);
	- information and analytical (implementation of socio-political analysis, preparation of
	business correspondence, reports, reviews, forecasts of the situation, translation editing;
	- creative (literary translation from a foreign language into a native language and from a
	native language into a foreign one);
	- publishing (translation, editing of publishing products, correcting);
	- research (collection and processing of practical material, preparation of reports and
	articles on the problems of translation studies and intercultural communication);
	- media activities;
	- pedagogical activity in educational institutions.
d) The functions of the graduate's professional activity	- Carrying out of research work;
are:	- performing translations
	- text editing, including in foreign languages;
	- conducting classes and lectures in educational institutions;
	- implementation of management in the field of education;
	- keeping business documentation in foreign languages in international organizations and
	business structures.

### Formulation of competence-based learning outcomes

Type of competences	Learning outcome	Learning outcome (according to Bloom's taxonomy)
	code	
1. Behavioral skills and personal	LO 1	Shows commitment to high social values, basic principles, and methods of philosophical cognition;
qualities:		readiness for professional interaction with the community and with all interested parties of
(Soft skills)		education based on accepted moral and legal norms.
	LO 2	Collects, analyzes, and selects information necessary to solve pedagogical and psychological
		problems.
	LO 3	Uses special professionally-oriented material in specified professional situations.
2. Digital competences:	LO 4	Applies modern innovative methods and technologies in the design and implementation of
(Digital skills):		professional activities.
	LO 5	Continuously improves knowledge and successfully adapts to changing technologies throughout a
		professional career.
3. Professional competences:	LO 6	Analyzes various directions in translation studies and linguistics; performs all types of translation
(Hard skills)		in interlingual and intercultural communication.
	LO 7	Perceives and generates foreign language speech in written and oral form, completing
		communicative tasks in all spheres of intercultural communication.
	LO 8	Freely speaks in terms of the concepts and categories of linguistics in the course of professional
		activity.

The u	niversity component													
D1	History and philosophy of	It is studied to form knowledge about the significance of	4	+	+									
	science	scientific cognition in its propensity to develop and change												
		socio-cultural profiles. The questions about philosophy,												
		methodology of science, science as a cognitive activity and												
		tradition, as a social institution, and a special sphere of												
		culture in modern civilization are considered.												
D2	Higher education Pedagogy	It is studied to form ideas and develop knowledge about the	4	+	+									
		modern paradigm of higher education and the theory of												
		scientific activity in higher education. The questions about												
		pedagogy, education of professional specialists, professional												
		teaching skills in educational organizations, pedagogical												
		control, and assessment of knowledge in higher education are												
		considered.												
D3	Management Psychology	It is studied to form knowledge about psychological	4	+	+									
		regularities of managerial activity; specifics of the use of												
		social and psychological knowledge in the structure of												
		manager's activity; skills of analysis of social and												
		psychological principles underlying effective management;												
		theoretical provisions and actual problems of management												
		psychology; peculiarities of management psychology;												
		personal characteristics of a manager.									<u> </u>			
D4	Foreign language	It is studied to develop skills and competences of foreign	4				+		+	+				
	(professional)	language speech activity for effective communication in												
		situations of professional communication. The course is												
		designed to teach the techniques of working with specialized												
		literature, practice of oral and written bilateral translation.												

The questions of peculiarities of a foreign language for special purposes and norms of professional speech are considered.  D5 Pedagogical practice  It is studied for in-depth study of one of the objects of professional activity of a graduate of Master's degree - educational process in various institutional and social educational institutions. It introduces the specific conditions of professional pedagogical activity; and helps to consolidate the theoretical knowledge of special disciplines, the necessary methods, skills, and abilities in the chosen specialty.  D6 Professionally oriented scientific communication (in English)  The course aims to acquire the basics of communication as a means of information activity, and further self-development. The forms and norms of the scientific style of speech, and logical culture of personality to search for truth in scientific dialogue or communication are studied.  Literary and creative writing. It covers the main aspects of structure and organization of literary works; development of skills of analysis and synthesis of information; mastering of literary writing style: rules of quoting and paraphrasing, as well as, development of skills of building logically connected arguments in written works.		I

studying the discipline is to shape an anthropocentrically										
oriented knowledge of language as a core part of culture, as a										
way of transferring socio-cultural information and shaping										

		national worldviews.							
	Introduction to SMART-	The course is designed to study the theoretical and practical			+		+		
	technologies in translation	aspects of the translation process, including the analysis of							
	and linguistics	various translation techniques and methods. It is aimed at							
		mastering the skills of employing a translation strategy, the							
		translation techniques between human and artificial							
		languages, including the use of Web 2.0 and artificial							
		intelligence tools.							
D8	Language and thinking	The course deals with a number of basic provisions of one of	5				+	+	+
		the most urgent linguistic issues of the language-thinking							
		relationship and cognitive linguistics, where language appears							
		as a cognitive mechanism that allows its speakers to acquire,							
		store and disseminate world knowledge. The study of this							
		discipline is associated with a change in the methodological							
		principles of modern linguistics based on anthropocentrism.							
	Linguistic and cultural	The course is designed to study various aspects of translation,					+	+	+
	aspects of translation	including cultural aspects, which encompass understanding							
		and cultural sensitivity of the language and notions of							
		communication; understanding and translating terms and							
		expressions related to the scientific field, as well as cultural							
		differences in scientific traditions and practices.							
	cycle of core disciplines								
	niversity component	1		,	 1		1		
D9	Translation and project	The course is aimed at developing competencies in the field	4		+	+			
	management	of administration, organization, support, and promotion of							
		translation services in the field of professional activity. The							
		purpose of studying the discipline is also to shape knowledge,							
		skills and abilities in the development of logical thinking,							
		skills in mastering design technologies, as well as defining							
		tasks within the framework of the goal set and technologies							
		for choosing the appropriate ways to solve them.							
D10	$\mathcal{E}$	The purpose of the course is planning and organization of	4			+	+		+
	translation and linguistics	research projects and scientific papers; the choice of research							

	T						1	1		1
		design for the development of research methodology,								
		hypothesis formation and work activity management with								
		data and is aimed at the formation of new knowledge and								
		theoretical understanding in the field of translation and								
		linguistics.								
D11	Translation didactics	The course is designed to study modern methods and	4		- +	+				
		technologies for training specialists in translation activities								
		associated with the activities of a translation teacher (teaching								
		activity) and a student (cognitive activity). The subject of the								
		discipline is a set of methods for studying translation, criteria								
		of the translator's professional competence, and the basics of								
		making up exercises for teaching oral and written translation.								
The e	lective component				II.			1		ı
D12	Current trends in	This course is aimed at studying such approaches as text-	7		+	+		+		+
	audiovisual translation	centric linguistic, functional-semiotic, functional-didactic,								
		communicative-semiotic and communicative-functional. This								
		course will help students get to grips with target audiences,								
		genres and plot moves, teach them to observe pseudo-								
		verbosity and achieve dynamic equivalence in translation,								
		master the basics of translation as to subtitles, voiceover and								
		dubbing.								
	Language localization	This course is aimed at understanding the basics of language			+	+		+		
		localization, which includes translation and cultural								
		adaptation of the product for its distribution and use in a								
		particular country/region. As part of the course studying								
		students will learn how to convey a point to the reader /								
		listener, taking into account cultural and social factors that								
		may affect the product perception by the target audience for								
		which the product is localized.								
D13	Interpersonal	This course is aimed at analyzing the transformations that are	7					+	+	+
	communication and digital	taking place in modern culture and presents a new model of								
	culture	dynamic interaction between culture and communication in								
		the era of digitalization. The course focuses on the critical								

		analysis of various models of communicative culture that predetermine aggressive or tolerant communication practices using the example of the most interesting, promising or symptomatic for contemporary Kazakhstani translation studies.						
	Technologies of linguistic impact on the target audience	This course is aimed at studying the technology of affecting the audience in the modern media space. Theoretical structures such as imprinting, priming, storytelling, framing and designing are considered in the learning process. These strategies include manipulative strategies that control communication in the knowledge society.				+	+	+
D14	Written translation of diverse texts	The course is designed to study and improve the professional skills of future translators, broaden their outlook in various fields of translation; work with texts of various subjects and styles. It helps to shape and improve knowledge and understanding of various principles and contexts of the text in the source and target languages.	7		+	+	+	
	Interpretation in the field of SMART technologies	This discipline is aimed at honing translation skills during conferences and the negotiation process in the form of role-playing games and case studies. The nuances of translation ethics are explained along with techniques for dealing with metaphors, idioms and unique cultural realities. A special place is held by consecutive translation, as well as the development of digital technologies.			+	+	+	
D15	Translation quality assessment	This discipline is aimed at teaching students professional methods of assessing the translation quality. The course examines quality control points, regular testing of translators' competencies, as well as analyzing customer feedback. This course will help students develop the skills necessary to ensure high-quality translation in the modern media space.	6		+	+		+
	Specialized translation. Abstractive summarization and annotation	This course focuses on working with texts related to a particular industry (for example, economics or law). The keynotes of specialized materials are the means to ensure the			+	+		+

		objectivity and consistency of presentation. Within the framework of the discipline, students will master the skills of working out a strategy for dealing with business literature and documents.					
D16	Research practice	The course is designed to explore the scientific methods required to develop research projects in the field of translation studies. It focuses on the study and construction of scientific research methodology, namely: collecting, analyzing, and interpreting data, as well as writing and presenting research papers in the field of translation studies and linguistics.	14			+	+

# Adjustment of expected learning outcomes with teaching and assessment methods

Learning	Learning outcomes	Teaching methods	Assessment methods
outcomes code			
LO 1 LO 2	As a result of studying this module, the Master's student should:  - analyze different directions in translation studies and linguistics, understand translation as a global transformational science;  - collect, analyze, and select information necessary for solving pedagogical and psychological problems;  - use special professionally oriented material in given professional situations;  - apply modern innovative methods and technologies in the design and implementation of professional activities;  - continuously improve their knowledge and successfully adapt to changing technologies throughout their professional activity	case methods, business games, training, debates, round tables, workshops, facilitation sessions	essay writing oral examination comprehensive test presentations contextual tasks peer evaluation
LO 4 LO 6 LO 7	As a result of mastering the module, the master's student should:  - analyse different directions in translation studies and linguistics, understand translation as a global transformation science;  - use special professionally oriented material in given professional situations;  - apply modern innovative methods and technologies in the design and implementation of professional activities;  - continuously improve their knowledge and successfully adapt to changing technologies throughout their professional activity;  - perform all types of translation in interlingual and intercultural communication;  - perceive and produce foreign language speech in written and oral form, completing communicative tasks in all spheres of intercultural communication;  - be able to freely speak in terms of concepts and categories of linguistics in the course of professional activity	active creative forms of learning: case studies, business games, training, debates, round tables, contextual tasks; workshops, facilitation sessions, and individual laboratory work; Flipped Class; digital and transmedia storytelling.	essay writing oral and written examination comprehensive test project contextual tasks peer evaluation
LO 3	- analyze different directions in translation studies and linguistics,	active creative forms of	essay writing
LO 4	understand translation as a global transformation science;	learning: case studies,	oral examination

LO 6	- use special professionally oriented material in given professional	business games, training,	comprehensive test
LO 7	situations;	debates, round tables,	project

# Criteria for assessing the achievability of learning outcomes

Codes of LO	Criteria
LO 1	<b>Knows:</b> basic theories of translation, methods of analyzing text, linguistic structures and language features, as well as cultural, social, and historical contexts, basic principles and techniques of philosophical cognition that influence translation
	Able to: analyze sources of social, historical, and philosophical context and target audience, select appropriate translation
	strategies, paraphrase and convey ideas in another language while preserving the meaning and style of the original, and work with various translation tools and software
	Possesses: skills in conveying complex ideas of social, historical, and philosophical context and nuances of language, preserving
	context and emotional tone, and adhering to professional and ethical standards of translation practice
LO 2	Knows: various sources of information such as observation, questionnaires, interviews, standardized tests, and other methods
	used in pedagogy and psychology
	Able to: apply different methods of data collection, adapt them to specific contexts and purposes, analyze the data obtained, and
	find patterns and trends in them that can be useful for decision-making
	<b>Possesses:</b> a high level of skill and competence in applying knowledge and skills to solve pedagogical and psychological
	problems
LO 3	<b>Knows:</b> specific professionally-oriented materials, their content, and role in a particular professional field.
	<b>Able to:</b> identify, evaluate, and select appropriate materials for specific tasks, adapt them to needs and goals, and use various tools and resources to access professionally-oriented materials.
	<b>Possesses:</b> the ability to analyze information, apply it in the context of work, and adapt professionally oriented materials
	according to the needs and requirements of the profession
LO 4	<b>Knows:</b> modern innovative methods and technologies in the design and implementation of professional translation activities
	Able to: work with relevant software and tools, adapt and apply methods and technologies to specific professional linguistic
	tasks, as well as integrate innovative approaches into the work of a translator
	<b>Possesses:</b> the ability to effectively use the possibilities of innovation to achieve goals and solve complex problems, as well as
	high adaptability to the changing environment and quick adoption of new methods and technologies.
LO 5	<b>Knows:</b> current innovations, research, and best practices related to work in the field of translation and linguistics and necessary
	to participate in professional events and share experiences with colleagues
	<b>Able to:</b> quickly process new information, assess its relevance, and apply it in translation, as well as use a variety of training
	resources and tools to expand the translator's professional background.
	<b>Possesses:</b> the ability to self-organize, continuous professional development, and readiness to learn new technologies and
	methods of work, as well as adaptability to changing environment, effective application of new knowledge, and necessary
	changes as challenges to continuous professional and personal development.

	<b>Possesses:</b> a deep understanding of linguistic concepts, the ability to apply them to different linguistic and communicative situations, the ability to think critically and analyze based on linguistic knowledge, as well as the ability to overcome difficulties and non-standard situations with the help of a linguistic approach and to propose new ideas and solutions based on linguistic concepts.
	<b>Able to:</b> analyze linguistic phenomena, identify their structure and function, and apply linguistic concepts to explain and interpret linguistic phenomena, as well as use linguistic methods and approaches to analyze texts, communication, and other linguistic processes of translation and linguistics
LO 8	<b>Knows:</b> the basic terms, models, and theories used in translation and linguistics, their application in the context of professional activity, as well as the basic principles, regularities, and trends in the study of language and communication
	<b>Possesses:</b> the ability to communicate fluently and competently in a foreign language in various situations and contexts, to generate ideas, argue their position and successfully interact with native speakers in various spheres of intercultural communication.
	<b>Able to:</b> read, listen, and understand a foreign language, express their thoughts, ideas, and emotions in this language, adapt their speech to different communicative tasks and contexts, use correct grammatical constructions, adequately select vocabulary and orientate in cultural peculiarities related to foreign language communication.
LO 7	<b>Knows:</b> the rules and structure of a foreign language, the specifics of communication in different contexts, and cultural nuances that impact on effective interaction with native speakers of this language.
	<b>Possesses:</b> a high level of skill and competence in performing all types of translation in interlingual and intercultural communication, taking into account cultural, social, and stylistic features of both languages and cultures about a specific communicative situation.
	<b>Able to:</b> translate in an interlingual and intercultural environment, adapt the translation to the target audience and context, transfer the meaning and nuances of the original into another language without loss of information, and work with various tools and resources necessary for intercultural dialogue.
LO 6	<b>Knows:</b> different types of translation, linguistic and cultural features of languages, principles and strategies of translation, as well as the specifics and characteristics of different languages and cultures.

# Graduate model of the educational program

<b>Types of competences</b>	Description of competences
1. Behavioral skills and	- The ability to communicate effectively and clearly both in written and oral form, express their thoughts and ideas clearly and
personal qualities:	distinctly, and be able to listen and understand other people, use language competently, and adapt communication to different
(Soft skills)	audiences and contexts.
	- The ability to effectively cooperate with other people within the framework of teamwork, listen to the viewpoints and ideas of
	other team members, accept constructive criticism, share knowledge and experience, as well as achieve common goals, and work
	in a coordinated team.
	- Willingness to learn new tools and technologies, as well as the ability to quickly adapt to different working conditions and
	project requirements.
	- The ability to be responsible for their actions and results, to show a high level of professional ethics, to meet deadlines and
	customer requirements, as well as to maintain confidentiality of information.
	- The ability to effectively manage time, set priorities, and organize their work.
2. Digital competences:	
(Digital skills):	- The ability to process and analyze large amount of texts and data using appropriate tools and techniques.
	- The ability to work with databases, and use tools for statistical text analysis, machine learning, and artificial intelligence.
	- The ability to assess the reliability of information, work with electronic resources, effectively use search engines and catalogs,
	as well as possess critical thinking skills in information processing.
	- The ability to ensure data confidentiality, use secure network connections, protect personal data, and comply with legislation
	and regulations in the field of information security.
3. Professional	- Understanding and application of basic concepts and methodological problems in the field of translation studies, intercultural
competences:	communication, and foreign languages studied.
(Hard skills)	- The ability to use specialized material in professional situations, including the ability to give detailed written descriptions on
	various topics, analyze the positive and negative sides of the presented position, formulate clear statements, highlight key points,
	and present pros and cons, as well as knowledge of the national cultural and professional characteristics of the language.
	- Possession of systematic knowledge of English grammar and automated skills of their application in various oral and written
	communication situations.
	- Proficiency in translation skills using text editors and translation programs, the ability to format translation documentation, as
	well as the ability to make stylistic changes in translation.
	- Proficiency in research work, including knowledge of the basic methods of linguistic and linguistic translation analysis,
	understanding of the structure and stages of scientific research, as well as the fundamentals of public speaking.
	- The ability to evaluate the quality of translation, edit, and self-edit texts, and compose abstracts and annotations.

- The ability to give detailed written descriptions on various topics, analyze the positive and negative sides of the presented
position, formulate clear statements, highlight key points, and present pros and cons, as well as knowledge of the principles of
goal setting.

– Knowledge of innovations in the field of language teaching, possession of the subject, psychological, pedagogical, and methodological knowledge, and skills.
