Alignment of planned learning outcomes with the methods of teaching and assessment within the module

| Learning outcomes | Planned learning outcomes for the module | Training methods | Assessment methods |
|-------------------|--|------------------------|--|
| LO 1 | Generalizes the main epistemological models, the nature of the transformation of the concept of rationality, classifies modern approaches to socio-humanitarian and natural science knowledge and their comeasurement, formulates and justifies the basic tasks of scientific research. | Discussion | Colloquium |
| LO 2 | Defines the approaches of conducting independent research and teaching activities on the basis of a wide multidisciplinary education, the use of a variety of research methods and modern educational technologies. | Case Methods | Student portfolio |
| LO 3 | Presents the main provisions and features of the practi- cal psychologist in the field of management, methods and techniques to improve the efficiency of the organi- zation on the basis of prevention and resolution of con- flict situations between the subjects of interaction. | Round table | Presentations |
| LO 4 | Studies and determines the necessary amount of knowledge of a foreign language for communication at the General and professional level, forms the skills of expression of thoughts and opinions in interpersonal, business, professional communication in a foreign language. | Communicative method | Writing an essay in a foreign language |
| LO 5 | Uses a foreign language in interpersonal communication and professional activities, conduct written communication in a foreign language, make business letters, applies methods and means of knowledge for intellectual development, cultural level, professional competence in business. | Project-based learning | Project preparation |
| LO 6 | Forms and evaluates the main approaches and methods of commercialization of the results of scientific and technical activities, systematizes the functions and tasks of management of commercialization processes. | Interactive lecture | Test |
| LO 7 | Formulates and defines the basic concepts, categories, knowledge, revealing the essence of innovation in business administration, especially the development of the theory of innovation, patterns of development of innovative processes, theory and practice of management. | Case Methods | Colloquium |

| LO 8 | Describe the conceptual basis and methodology of business studies and interpretation of business information, assistant analytical processing of the economic indicators business. | Master classes | Student portfolio |
|-------|--|------------------------|---------------------|
| LO 9 | Carries out business administration and planning of the enterprise, designs the management system of the Corporation taking into account its organizational and legal status, external and internal environment. | Case Methods | Test, |
| LO 10 | Carry out the main directions, methods of economic analysis, methods of identification and assessment of reserves of production; directions of use of results of the complex economic analysis of efficiency of business. | Project-based learning | Project preparation |
| LO 11 | Carries out system planning of the project at all phases of its life cycle; calculates the project schedule with the help of tools of calendar and network planning; provides effective management of changes. | Project-based learning | Student portfolio |
| LO 12 | Apply the conceptual framework of risk identification and assessment, develop a management strategy to neutralize them. | Master classes | Test |
| LO 13 | Studies the essence, structure and features of business planning of innovative projects, assesses its effectiveness under different conditions of investment and financing. | Discussion | Presentations |
| LO 14 | Develops and implements business strategies and effective business models, taking into account the characteristics, factors of choice and its transformation in modern conditions. | Interactive lecture | Project preparation |
| LO 15 | Provides the optimal choice of tools for the processing of socio-economic data in accordance with the task, analysis of the results of calculations and substantiation of the findings for the purposes of crisis business administration and sustainable development of the enterprise. | Interactive lecture | Project preparation |

Criteria for assessing the achievability of learning outcomes

| Codes of LO | Criteria |
|-------------|---|
| LO 1 | Knows: the main epistemological models, the nature of transformations of the concept of rationality; forms and methods of sci- |
| | entific, scientific and extra-scientific cognition, modern approaches to socio-humanitarian and natural science knowledge and |
| | their commensurability |
| | Can: formulate and solve problems that arise in the course of research activities and require in-depth professional knowledge; |
| | choose the necessary research methods, modify existing and develop new methods based on the tasks of a specific study; ana- |
| | lyze and comprehend the realities of modern theory and practice based on the methodology of socio-humanitarian and natural |
| | science knowledge |
| | Owns: skills of conducting independent research and scientific and pedagogical activities that require a broad multidisciplinary |
| | education; the ability to apply methodological and methodological knowledge in conducting scientific research, pedagogical |
| | and educational work; writing scientific articles, theses, speeches at conferences, symposiums, round tables, discussions and |
| | debates |
| LO 2 | Knows: the main provisions of the content of higher education, modern didactic concepts in higher education; features of the |
| | design and organization of the pedagogical process at the university, modern educational technologies; fundamentals of peda- |
| | gogical skills and pedagogical techniques, management in education, management of the process of formation and development |
| | of the personality of students |
| | Can: formulate and solve problems arising in the pedagogical process and requiring in-depth pedagogical knowledge; analyze |
| | and comprehend the realities of modern theory and practice of higher education; diagnose and advise students taking into ac- |
| | count the profile of future professional activity |
| | Owns: skills of conducting independent research and scientific and pedagogical activities that require a broad multidisciplinary |
| | education; the ability to apply methodological and methodological knowledge in conducting scientific research, educational and educational work |
| LO 3 | Knows: the main provisions and features of the activity of a practical psychologist in the field of management activities; meth- |
| LU3 | ods and techniques for improving the effectiveness of the organization |
| | Can: formulate and solve problems arising in management activities, apply knowledge in the field of theory and practice of or- |
| | ganizing potential opportunities in the organizational sphere |
| | Owns: skills of working with participants of the conflicting parties, the organizational system, providing them with psychologi- |
| | cal assistance in the management sphere; communication skills to solve problems in the field of management psychology |
| LO 4 | Knows: foreign language to the extent necessary to obtain professional information from foreign sources and elementary com- |
| 20. | munication at the general and professional level; general, business and professional vocabulary of a foreign language to the ex- |
| | tent necessary for communication, reading and translation (with a dictionary) of foreign-language texts of professional orienta- |
| | tion; basic grammatical structures of literary and spoken language |
| | Can: use a foreign language in interpersonal communication and professional activity; freely and adequately express their |
| | thoughts in conversation and understand the interlocutor's speech in a foreign language; conduct written communication in a |
| | foreign language, compose business letters; apply methods and means of cognition for intellectual development, improving cul- |
| | tural level, professional competence |
| | Owns: skills of expressing their thoughts and opinions in interpersonal, business and professional communication in a foreign |

| | language; various skills of speech activity (reading, writing, speaking, listening) in a foreign language |
|-------|--|
| LO 5 | Knows: a foreign language for communication at the general and professional level, forms business skills in interpersonal, |
| | business, professional communication in a foreign language |
| | Can: to work with specialized literature in a foreign language for the relevant branch of knowledge, |
| | to form a practical command of the language for general purposes; to conduct written business communication in a foreign lan- |
| | guage, to compose business letters |
| | Owns: business skills in business and professional communication in a foreign language; various skills of speech activity (read- |
| | ing, writing, speaking, listening) in a foreign language |
| LO 6 | Knows: a system of relations between market institutions and mechanisms of social regulation and stimulation of the develop- |
| | ment of science, education, high technologies, nanotechnology; functions and tasks of managing the processes of commerciali- |
| | zation of the results of scientific and scientific-technical activities |
| | Can: formulate the process of commercialization of scientific and scientific-technical research in order to identify problem |
| | points of turning scientific results into an intellectual product |
| | Owns: the skills of implementing a set of organizational, technical and economic measures to address the issues of commercial- |
| | ization of the results of scientific and scientific-technical activities |
| LO 7 | Knows: the main concepts, categories that reveal the essence of innovation in business administration, features of the develop- |
| | ment of the theory of innovation, patterns of development of innovation processes, theory and practice of international, national, |
| | regional and intra-company management of innovation processes, problems of the susceptibility of organizations to the intro- |
| | duction of new. |
| | Can: highlight the problems of managing innovation processes, develop innovative projects with positive results and access to |
| | markets |
| | Owns: skills of using methods of selection and evaluation of innovative projects, as well as methods of evaluation of innovative |
| | development in business administration |
| LO 8 | Knows: conceptual foundations and methodology of business research and interpretation of business information |
| | Can: conduct business research by choosing different methods for decision-making |
| | Owns: analytical processing skills of business economic indicators |
| LO 9 | Knows: the methodology of business administration of the enterprise, the main planned performance indicators of the organiza- |
| | tion; the purpose, structure and content of the main financial reports of the organization; the content and relationship of the |
| | main elements of the strategic planning and management process |
| | Can: use cost standards when developing appropriate proposals for the implementation of the developed enterprise activity |
| | plans |
| | Owns: business administration and enterprise planning skills, implementation of the organization's planning and reporting work |
| LO 10 | Knows: the main directions, methods of economic analysis of business efficiency, techniques for identifying and evaluating |
