Executive Director, President, Chairman of the Board,
manager) of the organization and other first leaders (referent, adviser)
Employees of law enforcement and special state bodies, prosecutors, courts (Indicate positions from professional standard, Sectoral qualification
framework)

b) Sphere and objects of professional activity

The sphere of professional activity of graduates in the educational program «7M04203 - Judicial and prosecutorial activities» are jurisdictional and law enforcement

Objects of professional activity

Objects of professional activity of masters according to the educational program «7M04207803 - Judicial and prosecutorial activities » are:
Public relations in the field of jurisdictional, law enforcement, supervisory activities and justice.

Subject of professional activity

The subject of professional activity of graduates in the educational program «7M04207803 - Judicial and prosecutorial activities » are:

- development and implementation of legal norms;
- ensuring law and order;
- legal education and training;
- scientific and pedagogical activity in higher educational institutions of higher and postgraduate education;
- scientific activities;
- Professional activities in law enforcement, courts, prosecutors.

c) Types of professional activity:

- Legislative activity
- Law enforcement
- Litigation
- Prosecutor's activity
- Law Enforcement

d) Functions of professional activity:

- Trial
- Prosecutor's supervision
- Judicial review and supervision
- Investigation, consideration and resolution of criminal, administrative offenses
- Forensic activities
- Protection and restoration of rights and freedoms of a person and a citizen, legal interests of legal entities, society and the state
- Identification and elimination of violations of the law, causes and conditions that contribute to them, as well as their consequences
- Coordination of the activities of law enforcement and other government agencies to ensure the rule of law, the rule of law and the fight against crime
- Validation of coercive and investigative actions
- Consideration of complaints against decisions and actions of bodies, officials
- Implementation of the powers of the investigative judge
- Design and expertise of legal acts regulating social relations.
- Application of legal norms in jurisdictional and law enforcement processes.
- Legal facts and legal relations arising in the field of law enforcement.
- Specialized expert and consulting assistance on legal and other issues in the field of jurisdictional proceedings
- Study of legal problems, giving advice to clients on the legal aspects of problems, handling cases of defense and prosecution in courts of general jurisdiction.

TR 5	Graduate research work, including internship and master thesis (RWOM)		24
TR 2,5	Final examination	Registration and defense of the master's thesis	8

Learning outcome attainability matrix

NN	Name of disciplines	Discipline Summary (30-50 words)	Number of credits	Formable training result (codes)												
				RT1	RT2	RT3	RT4	RT5	RT6	RT7	RT8	RT9	RT10	RT11	RT12	RT13
General modules																
D1	History and philosophy of science	It is studied with the aim of forming knowledge about the significance of scientific knowledge in its tendency to development and sociocultural profile. Questions about the philosophy, methodology of science, science as a cognitive activity and tradition are considered.	4	+					+							+
D2	Higher school pedagogy	Knowledge of the main provisions of the content of higher education, modern didactic concepts in higher education; features of the design and organization of the pedagogical process at the university, modern educational technologies; fundamentals of pedagogical skills and pedagogical techniques, management in education, management of the process of formation and development of the personality of students.	4	+	+											
D3	Psychology of management	It is studied with the aim of forming knowledge about the psychological laws of managerial activity, skills in analysis of socio-psychological principles, the	4	+	+											

		characteristics of the psychology of management, the personal characteristics of the leader.																
D4	Pedagogical practice	Studied in order to develop skills in developing and applying innovative methods, didactic methods in professional and scientific activities, skills in applying and using modern educational technologies, skills in conducting lecture and seminar type classes.	4	+														
D5	Foreign language (professional)	It is studied with the aim of developing speaking, reading, writing and listening skills for effective communication in situations of professional communication, work with specialized literature in various fields, two-way interpreting in situations of professional communication.	4			+												
Cycle of basic disciplines																		
Selectable Component																		
D6	International Standards in the Field of combating the laundering of illegal income and the financing of terrorism (CLI / FT) (in English)	It is studied to know about FATF and its implementation in national legislation; grounds for criminalizing financing of terrorism; regime of targeted financial sanctions for terrorism, proliferation of weapons of mass destruction, problems of adequacy of application of measures.	5				+										+	
D7	Anti-Money Laundering System (in English)	It is studied to know about institutional framework for international regulation of approaches to AML/FT. Criteria for evaluating the effectiveness of functioning of national AML/FT systems from the international standards' standpoint, proposals for their development are considered.	5				+										+	
D8	Innovative methods of investigating criminal behavior	It is studied to form skills of conducting a comprehensive psychological and forensic study of the criminal, using innovative methods. Theoretical, organizational, methodical, tactical, applied bases of diagnostics, research of criminal behavior, its formation and conditions of implementation are considered.	5														+	
D9	Academic and legal	It is studied to form skills of academic literacy,	5		+	+											+	

	writing (in English)	electronic and written communication, professional competence related to analytical research and text activities; selection and transformation of information, effective transfer of knowledge; presentation of research results, argumentation and counter-argumentation, critical thinking.																
D10	Commercial law	It is studied in order to form knowledge about the system of legal norms regulating trade relations, skills in drafting legal documents, consulting on legal regulation of commercial activity, qualification of actions and events in the field of commercial activity.	5							+								
D11	Commercialization of the results of scientific and technical activities	It is studied in order to form skills to use the results of scientific and scientific and technical activities, including the results of intellectual activity in order to withdraw new or improved goods aimed at extracting income to the market.	5							+								
Specialty oriented modules																		
University component																		
D12	Theory and practice of qualification of criminal offenses	The course is designed to study concept, meaning, methodological foundations, techniques and rules for qualification of criminal offenses, delimitation of related compositions. Learn to evaluate acts, consolidate results of qualification in procedural documents, identify and eliminate causes and conditions.	4											+				+
D13	Theory and practice of combating crimes against the person	It is studied to know about problems of qualification of criminal offenses against person, international acts in this field. The issues of delimitation of adjacent compositions, interpretation of qualifying signs, development of measures to counteract criminal violence are considered.	5											+				+
D14	Actual problems of criminal procedure legislation	The course is designed to study social value of criminal procedure law; objectives and principles; determining the practical effectiveness of the activities of the investigation bodies, the prosecutor's office and the court. Problematic institutions of criminal procedure law are considered.	5									+	+					

Specialty oriented modules University component																				
D15	Methods of teaching disciplines of the criminal law cycle	It's studied to form knowledge about features of organizing and conducting training sessions in criminal law disciplines, skills of a reasonable combination of classical teaching and new teaching methods, involving the introduction of technical innovations in the educational process.	4											+	+	+				
D16	Competence-based approach in the study of criminal cycle disciplines	It's studied to develop skills to apply innovative forms and methods in the process of studying criminal law disciplines as part of a competency-based approach. The academic methods of cognition of legal disciplines, active and interactive teaching methods are considered.	4											+	+	+				
D17	Theory of evidence in criminal proceedings (in English)	The course is designed to study patterns of cognitive process in criminal justice, understanding scientific concepts, express scientists' views on problems of legislative, law enforcement and cognitive activities concerning evidence. Issues of critical analysis of evidence are considered.	4											+			+			
D18	Problems of improving the criminal law	It is studied to develop skills in the application of criminal law, ability to qualify socially dangerous acts, statistical data. Legislative, doctrinal and law enforcement problems of current substantive law, main directions of improvement of criminal legislation are considered.	4													+				
D19	Proof in civil procedure	It is studied in order to form students' judgments on the application of legislation in the field of civil proceedings, ways to protect the rights and freedoms of citizens and legal entities, skills of legal assessment of situations and practical application of civil procedure legislation, drafting procedural documents.	4															+		
D20	Features of consideration of certain categories of civil cases	It is studied in order to form knowledge about the specifics of the procedure for considering the certain categories of civil cases based on the analysis of the provisions of the theory of various branches and subsectors of law, as well as to develop skills in applying the norms of civil, housing, family,	4																+	

		inheritance, labor, administrative, land, environmental and other legislation.																
D21	Legal nature of a criminal offense (in English)	The course is designed to study concept, signs, two-tier system, legal procedure for identifying a criminal offense and responding to it. Basis and conditions of application, delimitation of crimes and criminal offenses are considered.	4			+											+	
D22	Legal nature of administrative offenses (in English)	It's studied to know about concept, types, essential features of an administrative offense. Issues of bringing to administrative responsibility, drawing up administrative materials, proceedings on administrative offenses, close interconnection and interdependence of administrative offense and administrative responsibility are considered.	4			+											+	
D23	Criminological theories	It is studied to know about conceptual provisions of classical, anthropological and sociological schools of criminology, measures to counteract crimes; historical stages of criminological theories. Causes and conditions of crime, criminogenic properties of persons committing crimes, preventive measures are considered.	5															+
D24	Legal conflict theory	The course is designed to study legal conflictology as scientific direction. Legal norms, principles, institutions, modern forms and directions of prevention and resolution of legal conflicts, their management are considered. Legal-conflictological knowledge helps to find right solutions in difficult situations.	5			+												
D25	Forensic science: theory and practice	It is studied to develop skills to apply forensic analysis to proof's process. General and particular theories of forensic science, relevant scientific methods of research and system of technical means, techniques for investigating crimes based on them are considered.	4							+							+	
D26	Forensic science methods in the trial	It is studied to develop skills to obtain evidentiary information, sequence of actions performed in the process of considering criminal cases, related to the production of judicial actions, the appointment of a forensic examination and the use of the findings.	4							+							+	

Aligning planned learning outcomes with teaching and assessment methods within the module

Graduate attributes (developed based on competencies and learning outcomes):

Collaboration and teamwork

Initiative and creativity

Ability for continuous self-education

Teaching undergraduate disciplines in the field of study

Argued written speech

Public Speaking Skills

Ability for independent research activities

Implementation of scientific projects

Deep knowledge on the problems of scientific criminal procedural law

Knowledge of current trends in the development of the main areas of prosecutorial and supervisory activities

Skills of critical analysis of the current criminal legislation in order to improve it

Teaching results	Planned teaching results for the module	Teaching methods	Assessment Methods
TR 1	To be able to cooperate and work in a team; show initiative and creativity, including in unusual situations; to be able to permanent self-education; apply methods of psychological diagnosis and analysis in professional activities; teaching undergraduate / specialist disciplines in the direction of training.	interactive lecture	test
TR 2	To possess communication skills to work in an interdisciplinary and international environment; logically, reasonably and clearly build oral and written speech; use the skills of public speech, leading discussion and polemics.	discussion	colloquium
