21. Criteria for assessing the achievability of learning outcomes

Codes of LO	Criteria
LO1 -To show intelligence and creativity of thinking in conflict situations, the ability to establish cooperation with team members, sociability, entrepreneurship, customer orientation.	Knows: methods and techniques of creative thinking in conflict situations, be able to establish cooperation with team members
	Can: establish cooperation with team members, build contacts, be able to take into account the needs of the client
	Owns: methods of creative thinking in conflict situations, skills of establishing cooperation with team members, constructive and mutually enriching communication with other people
LO2 -To show knowledge of a foreign language in the field of professional and scientific activity, to show work in the mode of high uncertainty and rapid change of task conditions	Knows: methods and techniques of working in the mode of high uncertainty and rapid change of task conditions, a foreign language for free communication in the field of professional and scientific activity
	Can: freely and argumentatively express thoughts in written and oral form in a foreign language in the field of professional and scientific activity, work in a mode of high uncertainty and rapid change of task conditions
	Owns: general scientific terminology, terminology in the field of private law and business correspondence skills within the framework of international legal cooperation
LO3 -To identify problems and find ways to solve them with the help of systematic thinking, explain and offer options for resolving disputes in dealing with consumer requests	Knows: techniques, methods and procedures for identifying problems and finding ways to solve them with the help of systematic thinking, explains and offers options for resolving disputes in dealing with consumer requests
	Can: to identify problems and find ways to solve them with the help of systematic thinking, explain and offer options for resolving disputes in dealing with consumer requests
	Owns: the skills of applying systems thinking to identify problems and find ways to solve them, resolve disputes in dealing with consumer requests
LO4 -To analyze, interpret and critically evaluate data, information and digital content	Knows: methods and techniques of analysis, interpretation and critical evaluation of data, information and digital content
	Can: to analyze, interpret and critically evaluate data, information and digital content
	Owns: methods of analysis, interpretation and critical evaluation of data, information and digital content
LO5 -To analyze and process digital information from various sources	Knows: the state program «Digital Kazakhstan»
	Can: to analyze and process digital information from various sources
LO6 -To apply theoretical knowledge about the basics of the science of civil law and problems of law enforcement practice in the process of conducting	Knows: fundamentals of the theory of private law, the main directions of scientific research in the field of private law, promising areas of research in the legal science, the main methods of scientific research in the field of law

research work in the field of private law	Can: to plan, organize, conduct scientific research in the field of private law and to work with scientific and legal material
	Owns: the skills of conducting scientific research in the field of private law at the level of individual techniques, the application of scientific methods in the legal research
LO7- To analyze, generalize and compare various theoretical concepts, normative legal acts, judicial practice in the field of private law and to draw conclusions	Knows: methods and techniques of analysis, generalization and comparison of various theoretical concepts, normative legal acts, judicial practice in the field of private law
	Can: to competently analyze, generalize, compare and draw conclusions on various theoretical concepts, normative legal acts, judicial practice in the field of private law
LO8- To develop and carry out the examination of the civil law contracts; to professionally advise on legal issues in the field of civil law relations, civil law, entrepreneurial law, civil procedure law, labor law, family law, private international law	Knows: techniques, methods and procedures of professional legal advice in the field of civil law relations, the process of conducting legal expertise of the draft civil law contracts
	Owns: the skills of conducting legal expertise of the civil law contracts, professional legal advice
LO9- To apply theoretical knowledge in the field of intellectual property in the field of copyright protection, patent law and successfully commercialize the results of scientific activity	Knows: provisions of the current legislation in the field of intellectual property in the field of protection of copyright, patent law, non-traditional intellectual property objects
	Can: to use the conceptual apparatus to apply the provisions of legislation in the field of intellectual property, namely in the field of copyright protection, patent law
	Owns: the skills of protection and defence of the rights of subjects of copyright, patent law, skills of successful commercialization of the results of scientific activity
LO10- To apply the norms of substantive and procedural law in a qualified manner when considering the certain categories of civil cases in the civil proceedings, to offer reconciliation of the parties through the conciliation procedures	Knows: signs of normative legal acts of substantive and procedural law; the importance of legally significant facts and circumstances for the implementation of the rule of law when considering the certain categories of civil cases in the civil proceedings; techniques, methods and procedures of conducting the conciliation procedures for the reconciliation of the parties
	Can: to apply the acquired knowledge to understand the laws of law enforcement, identify legally significant factual data and circumstances when considering the certain categories of civil cases in the civil proceedings; to determine the rules of law to be applied when considering the certain categories of civil cases in civil proceedings; to distinguish between substantive and procedural norms; to understand the meaning and content of legal norms; to implement the norms of substantive and procedural law in the reconciliation of the parties through the conciliation procedures
	Owns: methods of independent modification and application of the norms of law; experience in the correct application of the norms of substantive and procedural law in the consideration of the certain categories of civil cases in the civil proceedings; ways of using different forms of implementation of the norms of substantive and procedural law in consideration of the certain categories of civil cases in the civil proceedings, as well as during the conciliation procedures in

	order to reconcile the parties
LO11 -To explain professionally the essence of legal norms in the process of implementing specific legal norms, interpret legal norms in the process of conducting training sessions, carrying out scientific activities, generalize the results of scientific knowledge	Knows: the process of implementing specific legal norms, lists and interprets legal norms in the process of conducting training sessions, carrying out scientific activities, summarizes the results of scientific knowledge
	Can: to correctly formulate the tasks proposed to learners and identify possible ways to solve them
	Owens: pedagogical techniques that contribute to the intensification of the mental process of learners, providing the emergence of non-standard approaches and proposals to solve the tasks

22. Model of a graduate of the educational program «7M04205–Private law»:

Graduate attributes:
High professionalism in the field of legal regulation of private law relations
Emotional Intelligence
Adaptability to global challenges
Leadership
Global citizenship
Understand the importance of the principles and culture of academic integrity

№	Types of competencies	Description of competencies
1	Behavioral skills and personal qualities (Soft skills)	Is able to work independently, as well as effectively interact with all team members. Is able to understand and improve personal, group and corporate goals. Is able to understand and productively show emotions, have a sense of empathy.
		Consistently and competently formulates and expresses his thoughts in a foreign language, has the skills of oral and written speech in a foreign language to work with scientific texts and in public speeches.
